NANTUIT Collaboration Solutions

Communication and Collaboration is at the core of business productivity and efficiency. Nantuit offers a number of Collaboration Solutions for clients intending to use SaaS (Software as a Service), IaaS (Infrastructure as a Service) and PaaS (Platform as a Service) based services with their traditional on premise IT infrastructure. Nantuit Collaboration Solutions are targeted for Enterprise interested in optimizing their user productivity in the areas of Messaging, Unified Communications, Portals, Enterprise Social, Business Analytics, Customer Relationship Management and PPM (Portfolio and Program Management).

Following are some of the key Collaboration Solutions we offer:

- **Secure Messaging and Compliance** - Microsoft Exchange or Microsoft Exchange Online provide organizations best-in-class hosted email, calendar and contacts on your PC, phone, tablet and web browsers, so you can have anywhere access to your information with easy IT management and enterprise-class security and reliability.
 - Control devices with enforced PIN lock and remote wipe
 - Continuous data backup and strict privacy policy
 - Protect email against being scanned for advertising purpose
 - Advanced tools to help manage risk – including organization-wide policies, legal holds on emails, etc.
- **Unified Communications** - Microsoft Lync or Microsoft Lync Online connects employees, partners and customers wherever they are helping you reduce costs while increasing productivity and responsiveness. Lync delivers a unified communications solution and gives users a consistent experience for presence, IM, voice and video across PCs, Macs, phones and browsers.
 - Microsoft Exchange and Microsoft Lync are at the core of providing Unified Communications capabilities for a hybrid cloud platform.
- **Enterprise Portals and Social Strategy** - Microsoft SharePoint or Microsoft SharePoint Online provide organizations best in class document management solution where your company and your people share and store ideas and information—everything from streamlining common tasks to powering business intelligence to making it easy to keep track of what colleagues are doing.
 - **Share** ideas, content, and vision through robust and intuitive social features, document libraries, activity feeds, and Microsoft SkyDrive Pro—a part of SharePoint.
 - **Organize** teams and tasks with simplified systems for tracking information, setting permissions, and sharing sites and documents inside and outside your organization.
 - **Discover** answers and insights by taking better advantage of the data and expertise you already have.
 - **Build** the portals, apps, and sites your business needs—without requiring customized development—with the new SharePoint app model and simplified intranet design.
 - **Manage** costs and meet the demands of compliance with SharePoint's efficient file input/output, reporting, and analytics features.

- **Big Data for Business Analytics** - Microsoft SharePoint with Microsoft SQL Server provide organizations get best-in-class business analytics platform. Having access to data is one thing. But employees need to easily gain insights from data to drive better business decisions in their day-to-day activities. This is business intelligence, or “BI,” and for many small and midsize businesses, it feels out of reach as they deal with the more pressing matters of the day. Now everyone in your organization can visualize and analyse data within the familiarity of Microsoft Office. Employees can easily create and customize rich, interactive dashboards and reports, giving your business the edge to capitalize on new opportunities before the competition does.
- **Customer Relationship Management** - Microsoft Dynamics CRM or Microsoft CRM Online provides organizations best-in-class Customer Relationship Management solution on premise or as a software as a service. Microsoft Dynamics CRM empowers the dynamic business that connects employees, partners, and customers using their preferred devices and channels of engagement. Microsoft Dynamics CRM is at the forefront of our key business solutions. It combines and harnesses technology trends, like cloud computing, mobility, social, and big data, to support your sales, service, and marketing aspirations. To deliver this vision, we focus on the following three areas of customization:
 - Outcome-focused, process-centric applications
 - Guided, contextual, and social user experiences
 - A flexible, agile, and open platform
- **Portfolio and Program Management** - Microsoft Project or Microsoft Project Online provides organizations best-in-class Portfolio and Program Management solution on premise or as a software as a service. **Microsoft Project Online** is a flexible online solution for project portfolio management (PPM) and everyday work. Delivered through Office 365, Project Online enables organizations to get started, prioritize project portfolio investments and deliver the intended business value—from virtually anywhere on nearly any device.
- Microsoft Project Online and Project Pro for Office 365 are also available as a single cloud service called **Microsoft Project Online with Project Pro for Office 365**. This is designed for people who need to manage with full project management capabilities on the desktop as well as work online from virtually anywhere on almost any device, Project Online with Project Pro for Office 365 enables organizations to get started, prioritize project portfolio investments and deliver the intended business value.
