

Solutions Overview

Key Solutions:

- **Security Solutions**
 - Identity & Access Management
 - Hybrid Cloud Identity
 - Secure Device Deployment
 - Secure Teleworking
 - Hybrid Data Protection
- **Hybrid Cloud**
 - Hybrid Cloud Identity
 - Virtualization & Private Cloud
 - Secure Device Deployment
 - IaaS and Data Center
 - Business Continuity
- **Collaboration**
 - Secure Messaging and Compliance
 - Unified Communications
 - Enterprise Portals and Social Strategy
 - Big Data for Business Analytics
 - Customer Relationship Management
 - Portfolio & Program Management
- **Mobility**
 - Secure Device Deployment
 - Enterprise Mobility
 - Mobile App Development
- **Development**
 - User Experience for Modern Applications
 - Modern Web Applications
 - Mobile App Development
 - Custom Applications Development - .Net & Java
 - Enterprise Integration

NANTUIT Development Solutions

Nantuit Consultants have decades of custom software development experience. Nantuit offers a number of Development Solutions for clients intending to customize their SaaS (Software as a Service) and PaaS (Platform as a Service) based services with their traditional on premise IT infrastructure. Nantuit Development Solutions are targeted for Enterprise interested in optimizing their development team by supplementing them with industry leading Nantuit Consultants, who leverage the Portfolio and Program Management solution, in addition to using industry leading methodologies, such as, the MSF (Microsoft Solutions Framework), Agile, Scrum, etc.

Following are some of the key development solutions we offer:

- **User Experience for Modern Applications** - Touch, voice and video enabled hardware has created the Modern Application category, which is being stretched by the integration of different kind of sensors, such as, GPS, motion, etc. Great User Experience significantly impact user productivity and adoption, besides reducing cost and increasing ROI.
 - Integrate User Experience specialists with the Development team, as they take the ideas from sketches, to wireframes around key personas through mock ups to build the target App for our clients.
 - Maintain consistency and simplicity in integrating user objects, such as color, graphics, images, audio and video.
 - Focus on the performance and scenarios from User Profiling to Usability Testing, be it a mobile phone, Smart phone, Tablet or a Phablet.
 - Lead with HTML5, CSS3, JavaScript and XAML targeted for platforms, such as, Android, iOS and Windows Phone/RT.
 - Leverage the tools of choice from Adobe, Apple, Microsoft to PhoneGap, WidgetPad, etc.
- **Modern Web Applications:** Boost the business impact of your digital solutions with Nantuit Modern Web Applications services that blend traditional creative disciplines like design, marketing, user experience, user interface design, copy writing, audio/video, animation and instructional strategy with a comprehensive understanding of the most innovative and effective enabling technologies.
 - Deploy User Experience specialist to focus on scenario based development
 - Maintain consistency and simplicity to integrate user interface objects, such as, color, graphics, images, audio and video.
- **Mobile App Development:** Nantuit Consultants specialize in large application development projects using Microsoft .NET, Java, HTML/CSS3/JavaScript technologies targeted for mobile devices, both the tablet and phone, running operating systems, such as Android, iOS, Windows Phone, Windows RT. Nantuit Mobile App Development Consultants are recognized leaders in delivering custom Mobile solutions.
 - We focus on creating the right user experiences, leveraging our User Experience Consultants for consistency and simplicity to maintain and integrate color, graphics, images, audio and video.

- The Mobile application development Consultants work with the User Experience team to develop the business code to deploy fully functional mobile applications for the targeted platforms.
- **Custom Applications - .Net & Java** – Nantuit provides on-site or off site teams specializing in large application development projects using Microsoft .NET and Java technologies. Nantuit employs Consultants who are recognized leaders in delivering custom software solutions.
 - Nantuit Consultants range from 5 years to 10+ years of development experience on Java or .Net platform.
 - Leveraging Microsoft Solutions Framework to develop applications, with security in mind, Nantuit Consultants focus on delivery quality software in the committed timeframes.
- **Enterprise Integration** – Nantuit Enterprise Integration Consultants focus on Microsoft BizTalk as the platform to integrate existing line of business applications to meet custom business requirements.
 - Leveraging cross platform development experience, Nantuit Integration Consultants, integrate different LOB applications, such as, Human Resource applications with Finance, leveraging standard based technologies, such as, XML, with security in mind.

Furthermore, to successfully deploy these NANTUIT Enterprise Solutions, we offer Business and Technology Consulting Services.
