 - Enterprise Mobility
 - Mobile App Development
- **Development**
 - User Experience for Modern Applications
 - Modern Web Applications
 - Mobile App Development
 - Custom Applications Development - .Net & Java
 - Enterprise Integration

NANTUIT Mobility Solutions

Mobile device adoption and secure deployment is a mandate for all CIOs. Providing customized mobile solutions for the enterprise users is a must for the agile IT enabled organization. Nantuit offers a number of Mobility Solutions for clients intending to enable BYOD (Bring Your Own Device) with their traditional on premise IT infrastructure. Nantuit Mobility Solutions are targeted for Enterprise interested in optimizing their user productivity in the areas of Messaging, Unified Communications, Portals, Enterprise Social, Business Analytics, Customer Relationship Management and PPM (Portfolio and Program Management) on their BYOD platform.

Following are some of the key Mobility Solutions we offer:

- **Secure Device Deployment** - Nantuit Secure Device Deployment solution provides organizations an optimized guidance to upgrade their Windows XP desktops to Windows 7 or 8x, Linux, Mac and BYODs, such as, Android, iOS, Windows RT or Windows Phone.
 - Built on Microsoft Systems Center Configurations Manager, Windows Intune, MDT, etc.
 - Hybrid Cloud solution, spanning both on premise and cloud based services.
 - Cloud only solutions for BYOD and Windows desktops.
 - Deployment Dashboard
- **Enterprise Mobility** - Microsoft Exchange Online or Microsoft Lync Online organizations get best-in-class hosted email, calendar and contacts, with Presence, IM, web and video-conferencing on your PC, phone, tablet and web browsers, so you can have anywhere access to your information with easy IT management and enterprise-class security and reliability.
 - Provide secure messaging, document sharing, IM, web and video-conferencing on Android, iOS, Windows Phone or Windows RT based mobile devices.
- **Mobile App Development** – Nantuit Consultants specialize in large application development projects using Microsoft .NET, Java, HTML/CSS3/JavaScript technologies targeted for mobile devices, both the tablet and phone running, operating systems, such as, Android, iPhone, iPad, Windows Phone, Windows RT. Nantuit Mobile App Development Consultants are recognized leaders in delivering custom Mobile solutions.
 - We focus on creating the right user experiences, leveraging our User Experience Consultants for consistency and simplicity to maintain and integrate user interface objects, such as, color, graphics, images, audio and video.
 - The Mobile application development Consultants work with the User Experience team to develop the business code to deploy fully functional mobile applications for the targeted platforms.

Furthermore, to successfully deploy these NANTUIT Enterprise Solutions, we offer Business and Technology Consulting Services.

If you are interested in any of these Services or Solutions, please review appropriate brochures, contact us at Nantuit offices or visit us at www.nantuit.com.
